

Ragdoll REVISITED

A BRIEF SEMINAR FOR THE SOLE PURPOSE OF CFA JUDGES'
CONTINUOUS EDUCATION

PREPARED BY: LAUREN TAN (RAGDOLL BCS)

A Tragic Moment For The Ragdolls

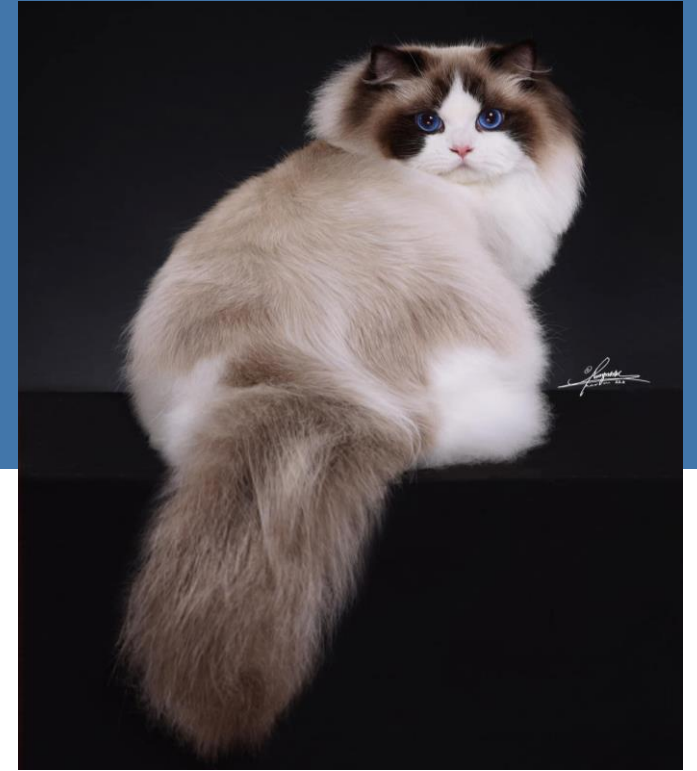

- Extreme, Persian-type Ragdolls are invading cat associations across the world.
- Increasing numbers of these cats are being shown and winning high titles in CFA, especially in Asian countries such as China and Japan.
- CFA's most popular breed is in jeopardy as the extreme type is winning in shows and gaining popularity. **Ragdolls should NOT look like Persians!**
- Breed Council is deeply concerned. Our CFA judges need help to identify the undesired traits in the show rings.

This is a Persian.

This is a Ragdoll.

Round head, small ears, cobby body, short tail. Does this cat look like a correct Ragdoll to you?

This is a Persian.

This is a Ragdoll.

Short legs with hind legs no longer than front legs. Thick woolly coat. Does this cat look like a correct Ragdoll to you?

Ragdoll Show Standard: The ideal Ragdoll is a well balanced cat with NO EXTREME features.

- They should have a proportionately large and broad head that is a modified wedge equilateral in shape.
- They should have large, vivid blue oval eyes, wide set and moderately slanted to complement the wedge.
- They should have medium-sized ears, wide set and moderately flared, wide at base with rounded tips, and tilted forward.
- They should have slightly curving profile, ending in straight, medium length nose.
- They should have large and long, broad and solid, heavy boned body, with moderately long legs and long tail.
- They should have non-matting moderately long fur with abundant guard hairs and minimal woolly undercoat.

- They should NOT have round head.
- They should NOT have small, round, or level-set eyes.
- They should NOT have small ears.
- They should NOT have short nose and short muzzle. ANY NOSE BREAK IS DISQUALIFY!
- They should NOT have short body, short legs, or short tail.
- They should NOT have heavy long coat with thick undercoat.

Ragdoll Show Standard:
